We Connect these wishes! We are based in Cluj-Napoca a modern university city in the north of Romania.

About the job

The industrial painter's activities are conditioned by the specifications from the paint supervisor/inspector, painting activities that differ from one client to another. Responsibilities such as preparing the product for painting (washing the piece, blowing/vacuuming, protecting the processed surfaces) are the responsibility of the painter. Other important aspects that the painter must take into consideration are: following the paint recipes that are different from product to product (the recipes are prepared by the paint inspector), adjusting the paint pump and applying the paint respecting the required environmental conditions, sanding the surfaces between layers of paint to ensure a uniform and adherent painting, with the help of the orbital sander; uses measuring devices to control the thickness and quality of the paint layer, corrects possible painting defects by polishing the surfaces and applying additional paint.

Study requirements

Medium, with certificate of professional qualification issued by the competent authorities/bodies.

Sound like a job you'd love to take on right away? **Please send us your application documents (CV/Curriculum vitae) by e-mail.**
